

Pristine Cocktail Shaker

by Cambridge

3. When ready to pour, just lift the stopper, turn it so that the double slot lines up with the pouring lip and the single slot lines up with the vent, then put it back in the shaker.

4. Now you can pour without spilling. Hold shaker in this position with fingers of one hand over stopper knob.

1. When ingredients are in the shaker, put the stopper in place, making certain that the slots are turned away from the pouring lip and the vent.

2. Hold shaker in both hands with one hand on the stopper knob. This makes a perfect seal. Shake vigorously to make sure of proper mixing of ingredients.
